What is Blockchain Mining?

Transaction initiated

**Transaction details
broadcasted to miners**

**Mining is completed
and miner gets reward**

Transaction complete

**Transaction is added to
the blockchain**

Blockchain Characteristics

Blockchain Types and Permissions

Types	Read	Write
Public	All	All
Private	Restricted	Restricted
Hybrid	All	Restricted
Consortium	Restricted	Restricted

Crypto Wallet

"Crypto wallets keep your private keys – the passwords that give you access to your cryptocurrencies"

PROS

- 👍 You don't need to worry about losing your private keys
- 👍 User-friendly interface

CONS

- 👎 Third Parties are more vulnerable to hacks and insolvency
- 👎 KYC reduces user anonymity

PROS

- 👍 You have control over funds and private keys
- 👍 Faster transactions
- 👍 No KYC
- 👍 Offline storage capability

CONS

- 👎 Funds may be lost forever if you lose your recovery phrase
- 👎 Less friendly user interface

Crypto Faucet

"Crypto faucets are platforms that provide users with **small quantities** of **cryptocurrency** for **completing** simple **tasks**"

Seed phrase

[crypto security]

A seed phrase, recovery phrase, or mnemonic phrase is a sequence of random words used for backup and recovery for crypto wallets.

- starts with a 128 bit entropy
- a unique 12 to 24 - word phrase
- follows BIP39 standard (a predefined list of 2048 words)
